▼ Home page message (HTML allowed)

PPoPP'19 artifact evaluation notes: <http://cTuning.org/ae/ppopp2019.html> .

► Clickthrough submission terms

▼ Submission message (HTML allowed)

Please,
prepare your submission as described at
<http://cTuning.org/ae/ppopp2019.html> . Use the same title as in your
original paper. Do not forget to provide a list of hardware, software,
benchmark and dataset dependencies in your abstract - this is essential
to find appropriate evaluators! Submit a PDF of your paper with Artifact

This message will appear on submission editing pages.

▼ Clickthrough reviewing terms (HTML allowed)

Please, use the following guidelines to review artifacts:
<http://cTuning.org/ae/reviewing.html> .

Users must "accept" these terms to edit a review. Use HTML and include a headline, such as
"<h2>Submission terms</h2>".

► Definition of conflict of interest

▼ Review preference instructions (HTML allowed)

<p>A

review preference is a small integer that indicates how much you want to evaluate an artifact. Positive numbers mean you want to review the artifact, negative numbers mean you don't, and -100 means you think you have a conflict or do not have an access to required hardware or software. -20 to 20 is a typical range for real preferences; multiple papers can have the same preference. The automatic assignment algorithm attempts to assign reviews in descending preference order. Different users' preference values are not compared and need not use the same scale.</p>

<p>The list shows all submitted artifacts. Select a column heading to sort by that column. Enter preferences in the text boxes or on the artifact pages. You may also upload preferences from a text file; see the "Download" and "Upload" links below the paper list.</p>
